

GXH-KSK4DH

Up to 30.5 SEER

ULTRA HIGH EFFICIENCY: Provides cooling up to 30.5 SEER and heating up to 10.5 HSPF

ENERGY STAR®: A high efficiency system provides lower utility costs.

ULTRA HEATING: Heat Pump technology provides heating performance by delivering up to 90% heating capacity at temperatures as low as -22°F

VARIABLE SPEED TWO-STAGE COMPRESSOR: Two-stage compressor provides extended heating capacity

INTELLIGENT DEFROST: Monitors the frost on the coil surface and saves energy by defrosting only when needed

SELF-DIAGNOSTICS: A built-in computer using real-time diagnostics helps to prolong the unit's life. Automatic diagnostics continuously scan for malfunctions and provide fault codes to make troubleshooting easy.

QUIET OPERATION: Minimal operating noise makes this outdoor unit among the quietest in the industry.

WLRC7

Controller Features

WIRELESS RF REMOTE CONTROL: The hand-held RF wireless controller is ergonomically designed and easy to use with a large display.

iFEEL MODE: The remote control senses the room temperature and adjusts airflow and temperature

CONTROL THE COMFORT WITH YOUR SMARTPHONE:

Universal WIFI and smartphone control make it easy to adjust comfort levels from your smartphone.

SLEEP MODE: Three sleep mode options automatically adjust the room's temperature. The slight shift in temperature significantly reduces energy consumption.
